DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant states a maskless board in instant claim, while the specification does not disclose a maskless board. The claim will not further considered on its merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-10 are rejected under 35 U.S.C. 102(b) as being anticipate by Hamada (USPN 6,906,282).

Hamada discloses a laser drilling apparatus, which uses a mask. A laser oscillator generates a beam, which passes through a mask having a predetermined pattern. Mirrors and lens are used. The workpiece is loaded on to a stage, which is movable. The mask stage and workpiece stage are controlled with a controller. The mask has a processing pattern having a plurality of holes that may have a random or regular pitch. Imaging lens (28) controls the direction of the laser beam on to the

workpiece surface. Ratios of the imaging lens determine the diameter of the holes.

(abstract, figures, col. 1, col. 2, lines 33-40)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Steur et al. (USPN 6,649,864) in view of Leighton (USPN 4,822,974).

De Steur et al. discloses laser drilling of holes in a circuit board substrate. A perforated mask is used to drill a hole with a predetermined diameter. During drilling the laser beam is moved in a circular path (wobble motion). (abstract, figures, col. 1-3)

De Steur et al. does not teach the angle of the wobble motion.

Leighton discloses the drilling of holes using a laser. The beam angle is controlled with a prism in order to various hole shapes. (abstract, figures, col. 1-3)

It would have been obvious to one of ordinary skill in the art at the time of the invention to determine the angle of the beam relative to the axis, as taught by Leighton in the De Steur et al. process because this is merely a measurement of the operational parameters and ensures the formation of a quality drilled product.

Response to Amendment

The amendment filed 10/26/0 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Applicant states a maskless board in instant claim, while the specification does not disclose a maskless board.

Applicant is required to cancel the new matter in the reply to this Office Action.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
